ADAPTEC FIREWIRE® PRODUCTS
TAKE ADVANTAGE OF TODAY'S HOTTEST PERIPHERALS

FireWire is as hot as its name suggests, supporting data speeds up to 400 megabits per second (Mbps). That makes the FireWire* standard ideal for digital camcorders, storage devices, scanners, CD-RW drives, and much more. Whichever Adaptec FireWire product you choose, you'll benefit from our unsurpassed experience in making advanced technologies easy to use. In fact, our cards are the standard that peripheral manufacturers themselves use to test the compatibility of their new FireWire products.

* FireWire is also known as iLINK and 1394

DVpics Plus™: Create, share & view DVD home movies

DVpics Plus is a complete kit for making great movies in a snap. It's quick and easy. Just pop the 3-port FireWire card into your PC and attach your DV camcorder. Then capture video from the camcorder and turn it into exciting movies. Sonic MyDVD 3 can then transform your movies into interactive CDs or DVDs. Also includes MGI VideoWave 4 SE software.

FireConnect™ for Notebooks: FireWire to go

Now you can take high-performance FireWire connectivity wherever you go - even make and share your own movies. With FireConnect for Notebooks, you get a 3-port FireConnect CardBus adapter, MGI VideoWave 4 SE, and Sonic MyDVD 3—all in one convenient kit.

DuoConnect™: The 2-in-1 card for today's fast peripherals

Why buy two PCI cards to get the high-speed connectivity you need? Featuring both FireWire and USB 2.0 connections on a single card, DuoConnect is a great value for both Macintosh® and Windows systems. Windows users can also enjoy the included MGI VideoWave 4 SE and Sonic MyDVD 3 software.

FireConnect 4300 Kit: Fast, easy FireWire connectivity

Adaptec's FireConnect 4300 Kit brings 3 ports of high-speed connectivity to your Windows or Macintosh system quickly and easily. We've even included award-winning MGI VideoWave 4 SE software to capture and edit video on Windows systems.

ADAPTEC USB 2.0 PRODUCTS
GO FOR MAXIMUM SPEED WITH USB 2.0

USB 2.0 is the fastest USB standard yet released, supporting data speeds up to 480 megabits per second (Mbps). That's *40 times faster* than USB 1.1! Use USB 2.0 for external storage, scanners, CD-RWs, and other high-speed devices—all with USB's legendary hot-plug-and-play simplicity. Adaptec's USB 2.0 products also offer full compatibility with USB 1.1 devices.[3]

When you select a USB 2.0 solution, trust Adaptec, the peripheral connectivity experts. And we back our products with our superior telephone and online support.

XHub™: Plug and play in style

By using an external hub instead of an adapter card, you don't need to open your PC to add USB ports. Just plug an Adaptec XHub into any available USB port and it's ready to go![4] These sturdy hubs are designed for stability, so your USB cables won't topple them over or drag them off your desk. And you can place the hub wherever you like for convenient access to your ports. Any time you need more ports, you can just snap another XHub onto the first one.

- **XHub4**: four ports for USB 2.0 and 1.1 devices

- **XHub4+**: reduces desktop clutter with a stand that integrates cables gracefully. We've even included a picture frame as part of the hub!

- **XHub7+**: just like the XHub4+, but with seven ports for maximum expandability

- Take control of your USB configuration with the included USBControl™ Utility. Its friendly and intuitive interface tells you where all your devices are connected and how they're performing, simplifies troubleshooting, and more.

USB2connect™: Drive all your USB peripherals to peak performance

The USB2connect card lets you easily attach high-speed USB 2.0 peripherals to your Mac or PC. USB2connect is available in both 4-port and 6-port versions.

USB2connect for Notebooks™: Turbocharge your notebook for high-speed USB 2.0 devices

Now you can take high-speed USB connectivity wherever you go. The USB2connect for Notebooks kit allows you to enhance your computer's portability and performance.

DuoConnect: The 2-in-1 card for today's fast peripherals

Why buy two PCI cards to get all the high-speed connectivity you want? Featuring both USB 2.0 and FireWire/1394 connections on a single card, DuoConnect is a great solution and a great value for both Mac and PC systems.[2] Windows users can also enjoy the included MGI VideoWave 4 SE and Sonic MyDVD 3 software.

For special offers and more information, visit www.getadaptec.com

[1] Supported formats: VideoCD, DVD-on-CD, and DVD.
[2] Adaptec USB 2.0 EHCI drivers for Windows 98SE, Windows Me, and Windows 2000 are included with DuoConnect. Check the Adaptec website for the latest information on USB 2.0 driver availability for Macintosh systems.
[3] USB 1.1 devices cannot operate at USB 2.0 speeds even when connected to a USB 2.0 hub or host adapter. USB 2.0 devices connected through a USB 1.1 hub are limited to USB 1.1 speeds.
[4] If your computer does not have a built-in USB 2.0 port, we recommend connecting the XHub4 to an Adaptec USB2connect or DuoConnect card for the highest-quality USB 2.0 connection.
